ANNIVERSARY QUARTZ SKELETON MOVEMENTS

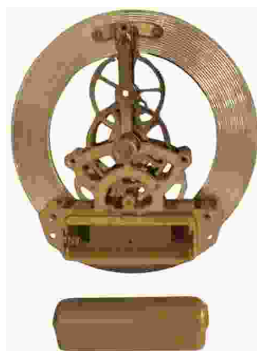

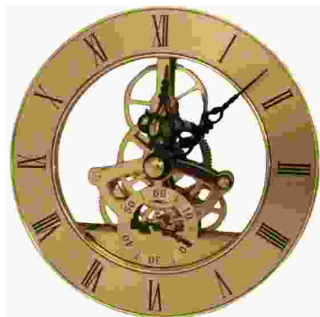

MST110

The Anniversary Quartz Skeleton Clock Movement offers both elegance and functionality in one stunning design. This exquisitely crafted timepiece showcases fully visible brass rotating gears that bring a sense of mechanical beauty. The brass-plated aluminum dial adds to its classic aesthetic, while a separate second bit ensures a timeless look. Designed with ease of installation in mind, this movement includes two sturdy posts for simple mounting to a base (base and mounting hardware are not included). The clock features a compact size of 4-1/2" in diameter, 6-1/2" in height, and 1-5/8" in depth. The posts are spaced approximately 2-3/4" apart (center to center) and measure 2" long. It operates on a single 'AA' battery (not included) and includes black hour, minute, and sweep hands for easy setup. Please note that no mounting hardware is included with the movement.

\$35.00

MST120

The NEW Floating-Style Anniversary Quartz Skeleton Movement is designed to add a modern and refined touch to any clock case, creating a unique floating effect when mounted. This beautifully crafted movement features fully visible brass rotating gears, a brass-plated aluminum dial, and a separate second bit, offering both aesthetic appeal and precise timekeeping. It operates on a single 'AA' battery (not included) and comes with black hour and minute hands for easy setup. Additionally, a battery cover is included for convenience. Please note that the clock case is not included with this movement, allowing you to customize the look to suit your style.

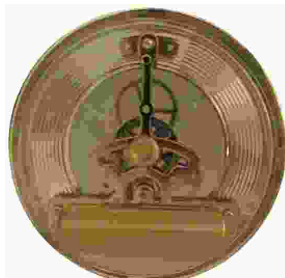

Mounting Idea Only

\$35.00

MST130

The NEW 4" Anniversary Quartz Skeleton Fit-Up Clock Movement combines classic elegance with easy installation, offering a seamless solution for creating a sophisticated timepiece. Designed to mount effortlessly into clock cases with an existing hole, this premium movement is built to fit flawlessly and enhance the aesthetic of any clock. It features fully visible brass rotating gears, a brass-plated aluminum dial, and a real glass lens, providing both durability and timeless charm. In addition to its beautiful design, the movement includes a screw-off gold bezel ring and a separate second bit, adding a refined touch. For added convenience, the included rubber mounting ring ensures a secure fit when needed. The movement operates on a single 'AA' battery (not included) and comes with black hour and minute hands, along with a battery cover. It's important to note that the wood clock case is not included, giving you the freedom to customize your clock design as desired. With its blend of classic style and practical features, this clock movement is perfect for creating a stunning timepiece with minimal effort.

CARRIAGE / TABLE CLOCK MOVEMENTS

MCA24 The Compact German-Made Alarm Clock Movement is a high-quality, precise, and reliable mechanism, perfect for miniature clocks, carriage clocks, desk clocks, and unique gift projects. Designed for versatility, its compact size makes it an excellent choice for custom creations. The case measures 2 inches in diameter and 5/8 inch in depth, with a shaft length of 3/32 inch (overall length of 1/4 inch). It features rear hand and alarm set knobs for easy adjustments. The movement requires a single 'N' battery (not included) and supports hands up to 4 inches long. There is no mounting hardware required, making installation straightforward. Additionally, the movement includes a red alarm hand for added functionality. Please note that press-on hour, minute, and second hands are sold separately.

**\$22.90**

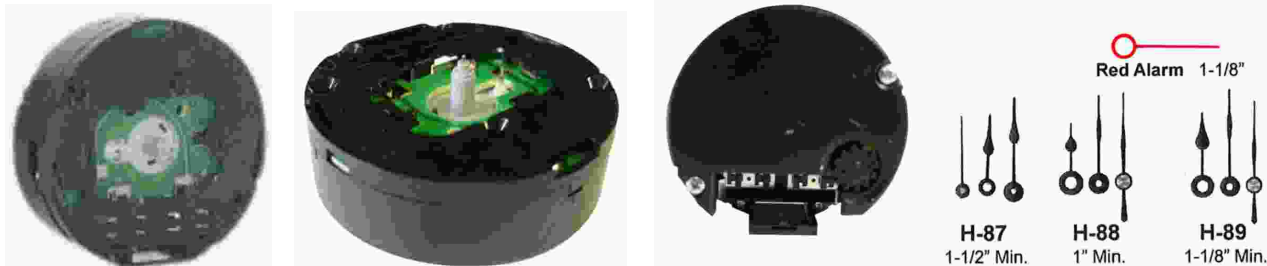

MCN24M This high-quality German-made clock movement is perfect for projects involving carriage clocks, miniature desk clocks, and special gift creations. Featuring an extra-long shaft, it is designed specifically for thicker dials, offering enhanced versatility. Unlike other round movements, this model utilizes regular battery hands instead of press-on hands, ensuring greater ease of use and convenience. The case size of the movement is 2 inches in diameter and 5/8 inch deep, while the shaft length measures 3/16 inch (with an overall length of 5/8 inch). It also includes a rear hand set knob for simple adjustments. The movement operates with a single 'N' battery, which is not included in the package. It supports hands up to 4 inches in length and comes complete with the necessary mounting hardware. Please note that the hands are not included with this movement.

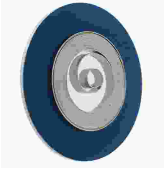

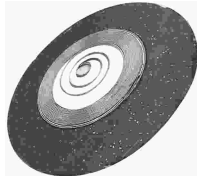

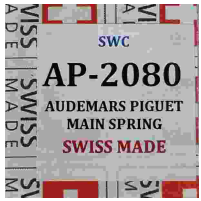

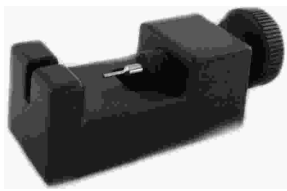

**\$23.90**

MCN22 The German Round Mini Clock Movement is a high-quality, precision-crafted movement ideal for small clocks, including delicate porcelain timepieces. Its sleeve nut mounting ensures secure installation, making it perfect for projects where stability is important. Despite its compact size, this movement is designed for smooth operation and accurate timekeeping, delivering the reliability you need for your clocks. The movement has a case size of 2 inches in diameter and a depth of 5/8 inch, making it a perfect fit for smaller clock designs. The shaft length ranges from 3/32 inch to 3/16 inch, with an overall shaft length of 3/8 inch. It operates using a single 'N' battery (not included) and features a rear hand-set knob for easy adjustments. Additionally, the movement includes mounting hardware for straightforward installation. Please note that the hour, minute, and second hands are sold separately and are designed to press onto the shaft. This mini clock movement is a perfect choice for any small clock project requiring precision and durability.

**\$23.90**

MCN24S The Compact German-Made Clock Movement is a perfect choice for a variety of miniature clocks and special projects, such as carriage clocks, miniature desk clocks, and unique gift creations. Crafted with precision and reliability, this high-quality movement combines exceptional performance with a compact design, making it ideal for smaller, intricate clock designs. The movement has a case size of 2 inches in diameter and a depth of 5/8 inch, with a shaft length of 3/32 inch (overall length: 3/16 inch). It includes a rear hand-set knob for easy adjustments and operates using a single 'N' battery, which is not included. This movement is compatible with clock hands up to 4 inches in length, giving you flexibility in design. Importantly, no mounting hardware is required for installation, simplifying the process. Please note that the hour, minute, and second hands are sold separately and are designed to press onto the shaft.

URGOS CLOCK MOVEMENTS

UM32319

Urgos Movement features a hand shaft length of 37mm and a movement pendulum length of 85cm. It operates on a Westminster chime and utilizes a chain drive type. This specific model is made in the Low Bridge version. The hammer is located at the back, and the movement has a beats per hour (BPH) of 4320. The plate dimensions are 130mm by 130mm, which is equivalent to 5 inches by 5 inches. Additionally, it includes a second hand feature. For weight requirements, if the pendulum bob diameter is 6.5 inches or less, you need two light weights and one heavy weight. Conversely, if the pendulum bob diameter is larger than 6.5 inches, you will need two heavy weights and one light weight. The movement is compatible with Seth Thomas parts A406-000 and A406-001.

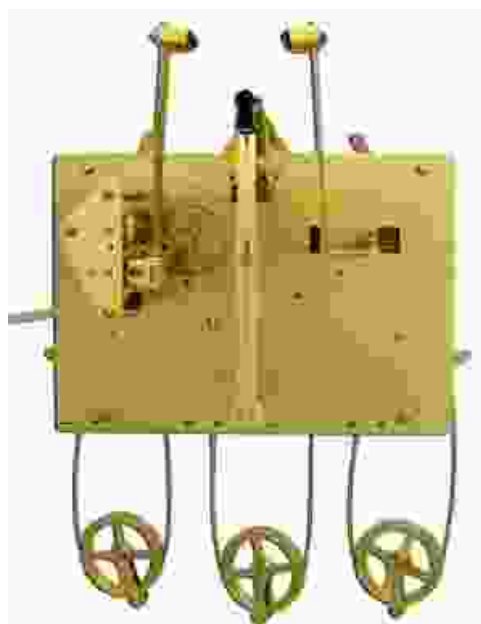

\$750.00

HERMLE CLOCK MOVEMENTS

HM1161/853-114

The Hermle Floor Clock Movement, designated as part number HM1161-853/114, features a pendulum length of 114 cm and a hand shaft length of 53.2 mm. This movement operates with a triple chime mechanism and is cable-driven, with the hammer located at the back. The dimensions of the movement plate are 140 mm by 200 mm. Weight requirements vary based on the pendulum bob diameter: if the diameter is 6.5 inches or less, the clock requires two light weights and one heavy weight, totaling 9.9 lbs and 7.7 lbs. Conversely, if the pendulum bob diameter is greater than 6.5 inches, it requires two heavy weights and one light weight. This movement is compatible with certain Seth Thomas clock models, including A407-002A, A415-001, and A415-011. It's important to note that the distance from the bottom of the movement plate to the hand shaft is 70 mm, or 2 7/8 inches, and the movement does not come with weights. For additional context, the available pendulum lengths for the 1161-850 Series are 94 cm and 114 cm, while the 161-853 Series offers lengths of 94 cm, 100 cm, and 114 cm.

\$795.00

HERMLE CLOCK MOVEMENTS

**NEW
ARRIVAL**

HM340-020

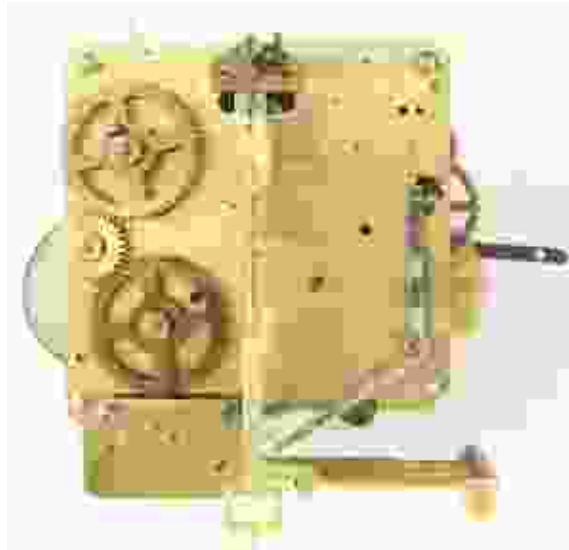

The Hermle 340-020 clock movement features a Westminster chime and operates on a spring-driven mechanism. It offers an 8-day duration and utilizes a balance escapement. The movement includes five hammers located at the bottom and has plate dimensions of 100 mm x 100 mm, with a beats per hour rate of 9000. The hand shaft length for the 340-020 model is 33.2 mm. This clock movement is identified by part number HM340-020 and is specifically designed as a Hermle mantle clock movement. It is compatible with several Seth Thomas models, including A401-003, A401-004, A401-005, A450-009, and A497-212.

\$450.00

HM341-021/45

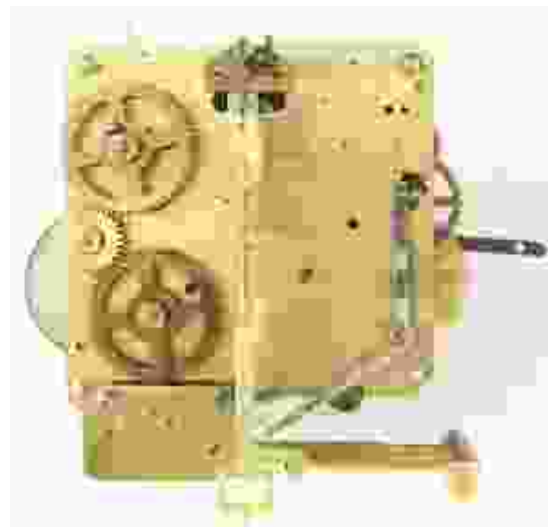

Hermle 341-021.45 FHS clock movement. This high-quality movement features a plate size of 100 x 100 mm and a hand shaft length of 27 mm. It is an 8-day Westminster chime movement, equipped with a quarter-hour chime and an hour strike. This key-wound, pendulum-regulated movement includes five hammers at the bottom. For your convenience, the key hole spacing is as follows: A) 41.75 mm, B) 42.8 mm, and C) 24.2 mm. The movement is complemented by a 45 cm long pendulum.

\$420.00

HM341-020/45

Hermle 341-020.45 FHS clock movement, a perfect blend of craftsmanship and precision. This movement features a plate size of 100 x 100 mm and a hand shaft length of 33.2 mm. It is designed as an 8-day Westminster chime movement, complete with a quarter-hour chime and hour strike. The mechanism is key-wound and pendulum regulated, ensuring reliable performance. With five hammers at the bottom, it produces a rich, resonant sound. For installation, the key hole spacing measures A) 41.75 mm, B) 42.8 mm, and C) 24.2 mm. Complete your clock with a beautifully balanced 45 cm long pendulum.

\$450.00

HERMLE CLOCK MOVEMENTS

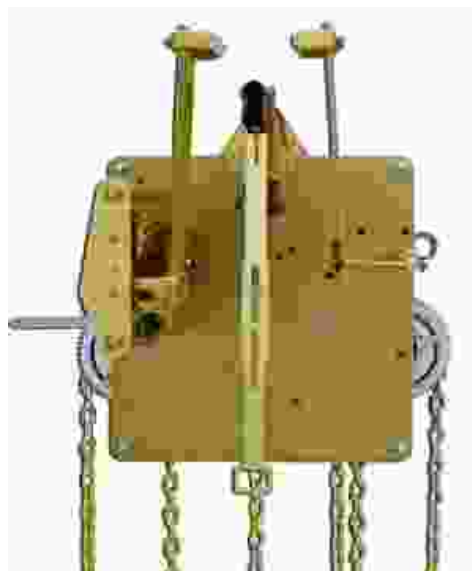

HM1050-020

Hermle Wall / Mantel Clock Movement, part number HM1050-020. This model features a triple chime system with bottom hammers and is spring driven for reliable performance. The hand shaft length measures 33.2 mm, and the movement includes a balance pendulum. The plate dimensions are 120 mm x 120 mm. Notably, the distance from the bottom of the hand shaft to the bottom of the plate is 2 1/8 inches, while the distance to the bottom of the hammers is 2 7/8 inches. This movement is compatible with Mason & Sullivan models 3602X and 3603X, as well as several Seth Thomas models, including A305-002, A305-004, A403-002, A450-012, and A502-002.

\$635.00

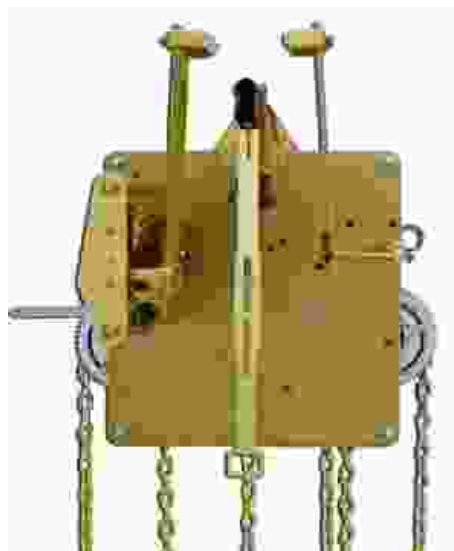

HM1151-050/94

Hermle Floor Clock Movement, part number HM1151-050/94. This model features a triple chime system and is chain driven for consistent performance. The hand shaft length is 33.2 mm, and the movement includes a pendulum with a length of 94 cm. The hammers are located at the back, and the plate dimensions are 120 mm x 120 mm. This movement requires weights of 4.7 lbs and 7.3 lbs for operation. Weight Requirements: If the pendulum bob is 6.5 inches or less, use two light weights and one heavy weight. If the pendulum bob is larger than 6.5 inches, use two heavy weights and one light weight. Additionally, it features an AutoBeat escapement for enhanced accuracy.

\$635.00

HM1151-053/94

Hermle Floor Clock Movement, part number HM1151-053/94. This model, known as the 1151-053SK/94, features a triple chime system and is chain driven for reliable performance. The hand shaft length measures 53.2 mm, and the movement includes a pendulum with a length of 94 cm. The hammers are located at the back, and the plate dimensions are 120 mm x 120 mm. This movement requires weights of 4.7 lbs and 7.3 lbs for operation. For weight requirements, if the pendulum bob is 6.5 inches or less, use two light weights and one heavy weight. If the pendulum bob is larger than 6.5 inches, use two heavy weights and one light weight. This model is compatible with several Seth Thomas models, including A403-009, A403-013, A403-020, and A403-021. Additionally, it features an AutoBeat escapement and includes a second hand and calendar features.

HERMLE CLOCK MOVEMENTS

HM1161-853/94

Hermle Floor Clock Movement, part number HM1161-853/94. This model, known as the 1161-853/94, features a triple chime system and operates on a cable-driven mechanism. The hand shaft length measures 53.2 mm, and the movement includes a pendulum with a length of 94 cm. The hammers are located at the back, and the plate dimensions are 140 mm x 200 mm. This movement requires weights of 9.9 lbs and 7.7 lbs for operation. For weight requirements, if the pendulum bob diameter is 6.5 inches or less, use two light weights and one heavy weight. If the pendulum bob diameter is larger than 6.5 inches, use two heavy weights and one light weight. This model is compatible with several Seth Thomas models, including A415-001, A415-003, A415-013, and A415-015. It is designed as an 8-day movement for reliable timekeeping.

\$795.00

HM132-071SE

Hermle Wall / Mantel Clock Movement, part number HM132-071SE. This model, known as 132-071/Balance, features a Ships Bell chime and is equipped with Ships Bell hammers. It operates on a spring-driven mechanism, with a hand shaft length of 27.6 mm and a balance pendulum. The plate diameter measures 90 mm, and this movement is designed as an 8-day mechanism. It includes an 11 Jewel Balance Escapement and operates at 300 beats per minute, totaling 18,000 beats per hour. This movement is compatible with Mason & Sullivan model 3397X and several Seth Thomas models, including A207-000, A207-005, A450-006, A468-323, A468-325, and A468-328.

\$825.00

HM451-050/94

Hermle Floor Clock Movement, part number HM451-050/94. This model features a Westminster chime and is designed with back hammers. It operates on a chain-driven mechanism, with a hand shaft length of 33.2 mm and a pendulum length of 94 cm. The plate dimensions are 120 mm x 120 mm. This movement includes an AutoBeat escapement and is an 8-day mechanism, featuring a total of eight back hammers. It requires weights of 4.7 lbs and 6.6 lbs for operation. For weight requirements, if the pendulum bob diameter is 6.5 inches or less, use two light weights and one heavy weight. If the pendulum bob diameter is larger than 6.5 inches, use two heavy weights and one light weight. This model is compatible with Mason & Sullivan model 3260X and Seth Thomas model A403-015.

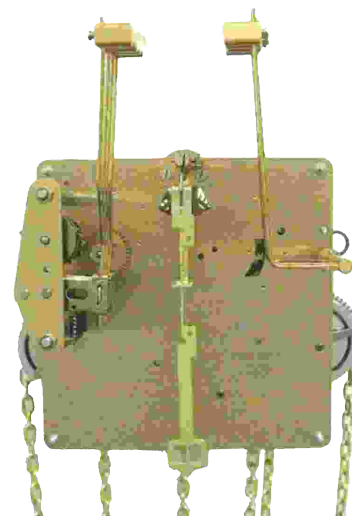

\$550.00

HERMLE CLOCK MOVEMENTS

HM451-050/94DBL

Hermle Floor Clock Movement, part number HM451-050/94DBL. This model features a Westminster chime and is equipped with back hammers. It operates on a chain-driven mechanism with a hand shaft length of 33.2 mm and a pendulum length of 94 cm. The plate dimensions are 120 mm x 120 mm. This movement includes a Dead Beat escapement with a low bridge design and requires weights of 4.7 lbs and 6.6 lbs for operation. For weight requirements, if the pendulum bob diameter is 6.5 inches or less, use two light weights and one heavy weight. If the pendulum bob diameter is larger than 6.5 inches, use two heavy weights and one light weight. This model is compatible with Seth Thomas model A403-015.

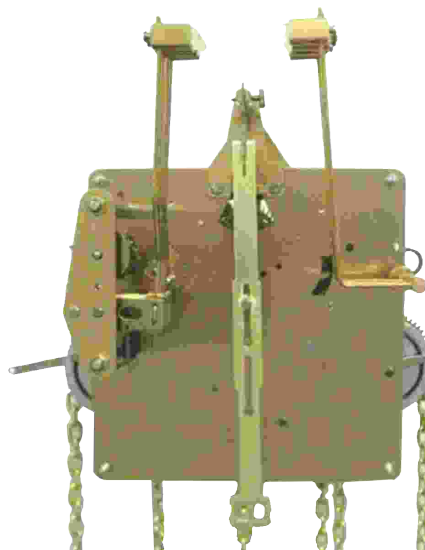

\$550.00

CUCKOO CLOCK MOVEMENTS

**NEW
ARRIVAL**

AM25

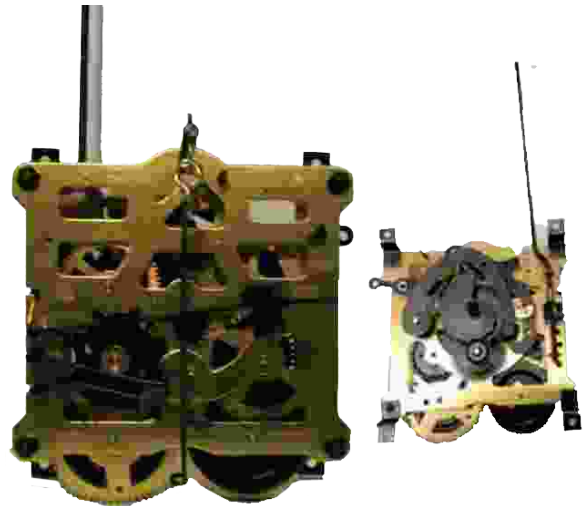

AM25 is a 1-day cuckoo movement model from Regula, specifically the Regula 25. It requires two weights and has a movement pendulum length of 19.5cm, or 7 ¾ inches. The hand shaft length measures 1 9/16 inches, and the movement has a beats per hour (BPH) rate of 8213. The plate dimensions are 73mm by 63mm. The suspension post length is 1 1/4 inches, or 33mm. For the AM25/08 model, the weights required are 420 grams (AW0420) x 2. Additionally, for the extended post used for the music activation lever, the required weights are 275 grams (AW0275) x 2.

\$150.00

AM34/63

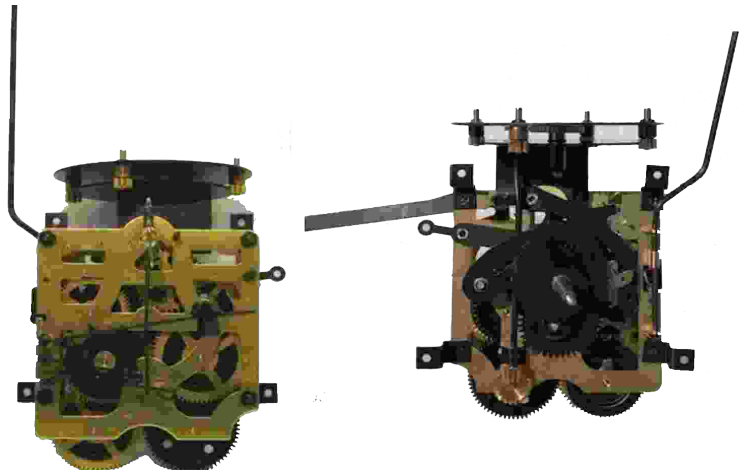

The AM34/63 is an 8-day cuckoo movement from Regula, specifically the Regula 34 model, designed for two weights. It features a movement pendulum length of 19.5cm (7 ¾ inches) and has a hand shaft length of 1 ¾ inches, with a suspension post length of 1 9/16 inches. The plate dimensions are 85mm by 76mm (3 3/8" x 3"). This movement is sold with chains and hand nuts, and it includes an extended post for the music activation lever. The weights required are 1260 grams (AW1260) x 2. It's important to note that the AM34/63 does not have an auto night-off feature. Additionally, the pendulum length for all Regula movements is measured from the suspension spring post to the center of the leaf, where it looks best on the stick.

\$240.00

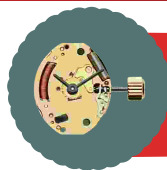

AM25/24

AM25/24 is a 1-day musical cuckoo movement featuring a 3-weight style with a dancing table. The plate size measures 73mm by 73mm, or 2 7/8 inches by 2 7/8 inches. This movement is sold with chains and hand nuts and includes an extended post for the music activation lever. The weights required for operation are 320 grams (AW0320) x 3. The hand shaft length is 1 9/16 inches, and the suspension post length is 1 1/4 inches. It is important to note that for all Regula movements, the pendulum length is measured from the suspension spring post to the center of the leaf, where it looks best on the stick. Additionally, the heights of the dancing tables are measured from the hand shaft to the top of the platform table where the dancers sit. The AM25/24 also features a dancer platform with a height of 58mm, or 2 1/4 inches, and has a movement pendulum length of 19.5cm, or 7 ¾ inches.
