SIRO LASERTEC PRODUCTS

SL10 Laser Welding System (Entry Level)

The SL10 is an easy-to-use laser welding system that provides barrier-free access to the working chamber thanks to the large opening at the front. As a desktop device with a very small footprint, the SL10 can be easily set up and is ready for use in no time even in very small rooms with pre-assembled furnishings. With a 5-liter water-cooling system, the SL10 is also suitable for continuous operation. The compact SL10 comes standardly equipped with an integrated camera, 60 W power output and a pulse frequency of up to 20 Hz. The laser parameters can be conveniently adapted to the respective welding task via the large touch display, or can be retrieved quite simply as a pre-defined welding program. The compact SL10 is therefore ideally suited for all laser welding tasks in a studio or a small workshop

Price: \$12,500

SL20 Laser Welding System (Beginners & Advanced)

Developed for small workshops the lasersystem SL 20 is characterized by a tremendous compact design. The device is designed for very small rooms with already preassembled furniture it is easily and quickly installed. With the SL 20 all laser welding tasks of a small workshop can easily be done. With 5 litres of water cooling the SL 20 is prepared for continuous operation. An efficient welding fumes extraction with fine dust particle filter is integrated as well. The high-quality stereo microscope magnifies 15x for optimal observation of the welding process. The optional mode aperture enables the beam diameter to be reduced to a mere 0.05 mm. This is of especially great benefit for very delicate work pieces. The SL 20 achieved despite its compact design remarkable performance data.

Price: 24,900

SL30 Laser Welding System (Company and Powerful)

Our SL30 is a good choice not only for newcomers - The extremely compact and high-performance table-top laser cutter will impress you, among other things, with its barrier-free access to the spacious working chamber. The sturdy metal housing provides better protection against electromagnetic radiation. With its average power of 100 watts, the SL30 can also be used for small-series production. Due to the standard mode screen (microbeam), a minimum beam diameter of only 0.05mm can be achieved. The stylish real-wood surfaces provide sufficient space to deposit tools and work pieces. As an option, the SL30 is also available with a Leicabinocular microscope with 16x magnification. Commissioning of the laser is completely tool-free and can therefore be easily performed by the users themselves without having to open the laser
